

Siddhant Yadav

Senior Product Designer | UX Designer

9560576241 | siddhantyadav20@gmail.com | [LinkedIn](#) | [Portfolio](#) | Delhi, India

PROFESSIONAL SUMMARY

Product Designer with 4.5+ years of experience designing and scaling B2B SaaS, marketplace, workflow, and consumer-facing products. Proven track record of leading product discovery, UX strategy, design systems, and end-to-end execution across web and mobile platforms. Experienced in partnering with product, engineering, operations, and leadership teams to improve adoption, operational efficiency, and business outcomes. Strong background in translating complex workflows into intuitive user experiences through research, experimentation, and data-informed decision making.

CORE STRENGTHS

Product Discovery • Product Strategy • UX Design • Design Systems • User Research • Usability Testing • Feature Prioritization • Information Architecture • Interaction Design • Accessibility • Experimentation • KPI & North Star Metrics • Growth Design • Roadmapping • Stakeholder Management • Design Ops • Cross-functional Leadership • Data-Driven Design • MVP Definition • Agile Product Development

PROFESSIONAL EXPERIENCE

UX Design Specialist

WIN Home Inspection • Chicago, USA (Remote) • Jun 2023 – Present

- Led zero-to-one design of a three-part inspection ecosystem: (1) a backend admin toolkit for managing remarks, subcategories, and report templates; (2) an offline-first mobile and tablet app with complex workflows — camera integration, gallery, heavy input forms, live interactions, and real-time preview; and (3) an interactive client-facing report with an integrated Property Care List and Cost Estimator — reducing total report writing time from 3 hours to 40 minutes (80% improvement).
- Designed a full-featured CRM for home inspectors covering order scheduling, team management, calendar and availability management, and dynamic pricing — cutting the order creation process from 15 minutes to 7 minutes and streamlining daily operations end-to-end.
- Owned product discovery activities including stakeholder workshops, workflow mapping, customer interviews, usability testing, and opportunity identification to drive roadmap decisions.
- Drove full user migration from a legacy application to the new platform within 3 months through cross-functional stakeholder alignment, onboarding flow design, and iterative usability testing.
- Built and maintained a multi-brand design system with reusable component libraries, design tokens, and style guides — enabling consistent UX across 5 products and significantly reducing design-to-development handoff time.
- Integrated AI-powered features including Image Recognition, Voice Assistant, and an AI Report Writing Bot; defined interaction models, edge-case user flows, and responsive design patterns across devices.
- Established a data-informed design process using Smartlook and Firebase for product analytics, heuristic evaluation, and A/B testing, ensuring every major release was validated before shipping to production.

Lead Product Designer

Mistry.Store • Gurgaon, India • Apr 2022 – Jun 2023

- Joined as founding designer and led end-to-end UX and product design of a B2B e-commerce platform enabling builders, contractors, and interior designers to discover, purchase, and manage building materials from 200+ brands across multiple project sites.
- Reduced order processing time by 60% and improved user satisfaction score by 40% through iterative usability testing, customer journey mapping, and data-driven redesigns.

- Designed and launched a loyalty points programme and credit line feature that differentiated the platform from competitors and directly increased lead generation.
- Conducted field research, contextual inquiries, and customer interviews to uncover user needs and identify high-impact opportunities.
- Partnered with engineering and stakeholders to define the product roadmap, prioritise features, and align design strategy with business OKRs.
- Worked in a hybrid product-design role: authored PRDs, GTM strategy documents, product roadmaps, and marketing collaterals including push notification and SMS campaigns.

Product Designer

LikeMinds · Gurgaon, India · Sep 2021 – Apr 2022

- Collaborated with product managers, engineers, and stakeholders to design user-centred experiences for a community-led engagement platform serving brands and creators on web and mobile.
- Designed chat modules, event creation flows, and community management tools — producing wireframes, prototypes, and high-fidelity mockups from concept through to production.
- Conducted user research through surveys, contextual interviews, and usability tests to inform design decisions and validate interaction patterns.
- Participated in design reviews and critiques, upholding design quality, accessibility standards (WCAG), and visual consistency across the product suite.
- Developed information architecture and user flows for new features, ensuring intuitive navigation and reducing friction in core user journeys.

TOOLS & TECHNOLOGIES

Design

Figma, Framer, FigJam, Miro, Zeplin, Lovable, Google Stitch, Principle, Claude

UX Methods

Wireframing, Prototyping, Interaction Design, Information Architecture, Journey Mapping, Design Thinking, Design Sprints, UX Writing, Accessibility (WCAG 2.1), Responsive Design

Analytics

Firebase, Smartlook, A/B Testing, Heuristic Evaluation, Qualitative & Quantitative Research

Design Systems

Component Libraries, Design Tokens, Style Guides, Multi-product Systems, Dev Handoff

Product

PRD Authoring, OKR Alignment, GTM Strategy, Design Ops, Agile Development

Collaboration

JIRA, Notion, Slack, Google Suite, Microsoft 365

EDUCATION

University of Delhi

B.Sc. (Hons) Computer Science · CGPA: 7.33 · 2021

St. Columba's School

PCM with Computer Science · 2018
